DETAILED ACTION

Amendment

1. Receipt is acknowledged of the amendment filed on October 15, 2004. In the amendment
5 claims 23-44 were newly added. Currently, claims 1-44 remain for examination.

Allowable Subject Matter

2. Claims 1-44 are allowed.
- 10 3. The following is the Examiner's statement of reasons for allowance: the claims are directed at a raster code scanner reading two-dimensional optical code, and in particular scanning beam creates the region of apparent greater brightness for assisting in alignment of two-dimensional scanning pattern. Such effect is obtained by the shaping of the mirror, which reflects scanning beams as illustrated in figures 2A-2D. As found in many references provided
15 by Applicant, alignment of the reader to the target (i.e., spotter beams, cross-hair marker, and other form of mark around the target or in the viewing area of the reader) is well known in the art, and widely used in the industry. However, the cited references, taken alone or in combinations, fail to suggest or teach an optical scanner comprising the raster scanning assembly further comprising optical elements producing an outgoing beam wherein the apparently brighter
20 region is shaped suitably for assisting in alignment of the scanning pattern as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
